

DAY 4: VISHING & SMISHING SIMULATION SCRIPTS REPORT

Date: August 27, 2026

Name: Kaif Dhukka

Module: Phase 1 – Recon & Social Engineering

1. Objective

To construct a Python-based social engineering awareness script generator that models Voice Phishing (Vishing) and SMS Phishing (Smishing) scenarios to educate employees on recognizing psychological manipulation.

2. Key Concepts

- **Vishing (Voice Phishing):** Phone-based manipulation where attackers impersonate trusted roles (IT admins, bank officials) to extract confidential credentials.
- **Smishing (SMS Phishing):** Text-message attacks leveraging short links and high urgency to direct targets to malicious landing pages.
- **Pretexting:** Crafting a deceptive backstory (e.g., unauthorized transaction alert) to justify the request for sensitive information.

3. Psychological Triggers Analysis

- **Authority:** People are conditioned to obey authority figures (e.g., IT Support or Tax Compliance Officers).
- **Urgency & Scarcity:** Setting arbitrary deadlines (e.g., "within 2 hours") bypasses critical thinking and forces panic-driven compliance.
- **Fear:** Threats of account suspension or legal penalties manipulate victims into sharing OTPs and passwords.

4. Proof of Execution

```

=====
VISHING AWARENESS SIMULATION SCRIPT: IT SUPPORT
=====
Caller Role   : IT Helpdesk Specialist
Target Org    : Sqrock Corp
Pretext       : Password Expiry Audit

[OPENER]
"Hi, this is Alex from Sqrock Corp IT Support. We detected unusual security alerts on your employee account."

[HOOK / URGENCY]
"We are resetting compromised tokens right now. Can you quickly confirm your employee ID and your current active password?"

[RED FLAGS FOR AWARENESS]
-> Legitimate IT will NEVER ask for plain-text passwords over the phone.
-> Triggers Used: Authority (IT Dept) + Scarcity/Urgency (Immediate lockout risk).
=====

=====
VISHING AWARENESS SIMULATION SCRIPT: BANK FRAUD
=====
Caller Role   : Fraud Prevention Officer
Target Org    : Global Bank
Pretext       : Unauthorized Wire Transfer

[OPENER]
"Good day, I am calling from the Fraud Prevention Division at Global Bank."

[HOOK / FEAR]
"An unauthorized transaction of $1,250 was just attempted from your account in another location. To block this payment immediately, please read out the 6-digit OTP sent to your phone."

[RED FLAGS FOR AWARENESS]
-> Banks never ask for OTPs or PINs to cancel transactions.
-> Triggers Used: Fear (Financial loss) + Urgency (Preventing transfer).
=====
```

```
=====
SMISHING/VISHING SCRIPT: GOV / TAX AUTHORITIES
=====
Caller Role   : Tax Compliance Officer
Target Org    : Internal Revenue Dept
Pretext       : Overdue Audit Fine

[OPENER]
"[ALERT] Internal Revenue Dept Legal Notice: Immediate action required regarding unpaid tax audit penalties."

[HOOK / AUTHORITY]
"Failure to verify your identity and settle overdue compliance charges within 2 hours will result in legal escalation and account freeze."

[RED FLAGS FOR AWARENESS]
-> Government agencies do not demand immediate phone payments or secret credential verification via SMS/calls.
-> Triggers Used: Extreme Authority + Fear of Legal Penalties.
