

DAY 3: PHISHING PAGE ANATOMY & DETECTION REPORT

- **Intern Name:** Kaif Dhukka
- **Date:** August 26, 2026
- **Module:** Phase 1 – Recon & OSINT

1. Objective To build a rule-based URL phishing detection engine in Python to analyze structural indicators of phishing links (such as HTTP usage, raw IP domains, excessive subdomains, and suspicious keywords).

2. Scoring Logic & Factors Explanation

- **HTTP Protocol (No SSL):** Adds +30 risk. Phishing sites often use unencrypted HTTP connections to host disposable phishing pages.
- **IP Address as Hostname:** Adds +40 risk. Legitimate companies rarely host public user-facing services directly via raw IPv4 addresses.
- **Subdomain Abuse (>3 dots):** Adds +25 risk. Attackers stack multiple subdomains (e.g., paypal.fake-site.ru) to hide the real domain on mobile browser bars.
- **Suspicious Keywords in Domain:** Adds +20 risk. Words like login, bank, verify, and secure in domain paths aim to deceive users.

3. Execution Results Summary

- [http://192.168.1.1/login.php] -> **70% Risk [HIGH RISK]**
- [http://my.account.verify.login.paypal.fake-site.ru] -> **75% Risk [HIGH RISK]**
- [https://github.com] -> **0% Risk [LOW RISK]**

4. Proof of Execution

```
PS C:\Users\LAPPP\OneDrive\Documents\Sgrock Cybersecurity Internship\Day_03_Phishing_Detection> python phishing_detector.py

DAY 3: URL PHISHING ANATOMY & DETECTION SCORES
=====
URL   : https://paypal-login.evil.com/verify
Result: 20% Risk [SAFE / LOW RISK]
-----
URL   : http://192.168.1.1/login.php
Result: 70% Risk [SUSPICIOUS/HIGH RISK]
-----
URL   : https://secure-update-bank.com/account
Result: 20% Risk [SAFE / LOW RISK]
-----
URL   : http://my.account.verify.login.paypal.fake-site.ru
Result: 75% Risk [SUSPICIOUS/HIGH RISK]
-----
URL   : https://github.com
Result: 0% Risk [SAFE / LOW RISK]
-----
URL   : https://google.com
Result: 0% Risk [SAFE / LOW RISK]
-----
URL   : http://bank-account-update.net
Result: 50% Risk [SUSPICIOUS/HIGH RISK]
-----
URL   : https://wikipedia.org
Result: 0% Risk [SAFE / LOW RISK]
-----
URL   : http://10.0.0.1/verify/account
Result: 70% Risk [SUSPICIOUS/HIGH RISK]
-----
URL   : https://login.microsoftonline.com
Result: 20% Risk [SAFE / LOW RISK]
